SwissCaRe – SwissCaRe Qualitätsregister für Koronare Angiographie und Angioplastie

Kurzbeschreibung

The SwissCaRe registry aims to maintain and improve the quality of coronary angiography (CA) and percutaneous coronary interventions (PCI) in Switzerland. The definition of treatment quality is based on the current European (ESC) guidelines. Specifically, the SwissCaRe registry aims to monitor treatment quality of consecutive patients by 1) reporting the annual number of patients and describe relevant baseline and procedural characteristics, 2) assessing the indications for undergoing CA and PCI, 3) assessing selected ESC-guideline endorsed procedural quality indicators of patients undergoing PCI, 4) assessing selected ESC-guideline endorsed contraindications (Class III recommendations), 5) reporting severe procedural complications of all patients undergoing CA and PCI and 6) reporting mortality of all patients undergoing PCI.

Weitere Informationen

Fachrichtung	Kardiologie
Registertyp	Klinisch
Datenarten	Krankheit/ Diagnose, Intervention/Therapie, Risiken/ Gesundheitsrelevante Bedingungen, Ergebnis-, Prozess-, Strukturqualität
Status	Aktiv, seit 2023
Population	All patients undergoing CA and/or PCI in Switzerland are eligible.
Periodizität	Kontinuierlich
Geografische Abdeckung	National, Currently, the registry is still in the on-boarding phase. >90% of service providers intend to participate in the registry. No significant gaps are expected from 2025 onwards.
Trägerschaft	Medizinische Fachgesellschaften

Finanzierung	Gemischt
Schnittstellen	
Datenerfassung	In digitaler Form (Computer-unterstützte Dateneingabe), There are 2 options for data entry: 1) Web-based data entry or 2) interface for automatic transfer of data from local clinic information system.
In digitaler Form (Computer-unterstützte Dateneingabe)	5 min
Teilnahmepflicht	
Teilnahmemöglichkeit	Ja, unter bestimmten Voraussetzungen
Einwilligung Patienten	Ja
Personenbezug	Personenbezogen (der Rückschluss auf Personen ist möglich)
Datenschutz	The registry is hosted by SwissRDL of the University of Berne. Data security and safety are guaranteed by the IT regulations of the University of Berne.
Datenzugang	Ja, Application for data access will be reviewed and decided on by the Steering Committee.
Qualitätssicherung	Central data monitoring on a quarterly basis is in place. Additionally, site monitorings are conducted on an biannual basis.
Berichterstattung	Ja, Annual report

Betreiberinstitution

Schweizerische Gesellschaft für Kardiologie
Dufourstrasse 30
3005 Bern
