### SwissCaRe – SwissCaRe Qualitätsregister für Koronare Angiographie und Angioplastie

#### Kurzbeschreibung

The SwissCaRe registry aims to maintain and improve the quality of coronary angiography (CA) and percutaneous coronary interventions (PCI) in Switzerland. The definition of treatment quality is based on the current European (ESC) guidelines. Specifically, the SwissCaRe registry aims to monitor treatment quality of consecutive patients by 1) reporting the annual number of patients and describe relevant baseline and procedural characteristics, 2) assessing the indications for undergoing CA and PCI, 3) assessing selected ESC-guideline endorsed procedural quality indicators of patients undergoing PCI, 4) assessing selected ESC-guideline endorsed contraindications (Class III recommendations), 5) reporting severe procedural complications of all patients undergoing CA and PCI and 6) reporting mortality of all patients undergoing PCI.

#### Weitere Informationen

<b>Fachrichtung</b>	Kardiologie
<b>Registertyp</b>	Klinisch
<b>Datenarten</b>	Krankheit/ Diagnose, Intervention/Therapie, Risiken/ Gesundheitsrelevante Bedingungen, Ergebnis-, Prozess-, Strukturqualität
<b>Status</b>	Aktiv, seit 2023
<b>Population</b>	All patients undergoing CA and/or PCI in Switzerland are eligible.
<b>Periodizität</b>	Kontinuierlich
<b>Geografische Abdeckung</b>	National, Currently, the registry is still in the on-boarding phase. >90% of service providers intend to participate in the registry. No significant gaps are expected from 2025 onwards.
<b>Trägerschaft</b>	Medizinische Fachgesellschaften

<b>Finanzierung</b>	Gemischt
<b>Schnittstellen</b>	
<b>Datenerfassung</b>	In digitaler Form (Computer-unterstützte Dateneingabe), There are 2 options for data entry: 1) Web-based data entry or 2) interface for automatic transfer of data from local clinic information system.
<b>In digitaler Form (Computer-unterstützte Dateneingabe)</b>	5 min
<b>Teilnahmepflicht</b>	Nein
<b>Teilnahmemöglichkeit</b>	Ja, uneingeschränkt
<b>Einwilligung Patienten</b>	Ja
<b>Personenbezug</b>	Personenbezogen (der Rückschluss auf Personen ist möglich)
<b>Datenschutz</b>	The registry is hosted by SwissRDL of the University of Berne. Data security and safety are guaranteed by the IT regulations of the University of Berne.
<b>Datenzugang</b>	Ja, Application for data access will be reviewed and decided on by the Steering Committee.
<b>Qualitätssicherung</b>	Central data monitoring on a quarterly basis is in place. Additionally, site monitorings are conducted on an biannual basis.
<b>Berichterstattung</b>	Ja, Annual report
